CLINICAL REVIEWS & COMMENTS:

"The slush was perfect!!!! (AND THE ROOM WAS SO QUIET)" BSN RN CNOR | Educator | CVOR

"This is the best slush I've ever used." Chair | Dept of Cardiothoracic Surgery | Academic Medical Center

"It has produced consistent quality slush every single time." RN | CVOR

"It was a definite upgrade with sterile slush in a tamper-proof container."
Clinical Director | Perioperative Services

"Should slush in a sterile self-contained package be standard of care? I believe it should."
Medical Director | Practicing Urologist

"After 30 years somebody finally figured out surgical slush." Cardiac Surgeon | Regional Medical Center

"Nice job on the design. You guys are amazing." Transplant Nurse Manager | Academic Medical Center

"Our experience has been very favorable." CMO | OPO Executive VP | Leading Transplant Surgeon

"I love it." Recovery Manager | OPO

"It's great to have one piece of equipment to service multiple rooms." RN | CVOR

Auto-Controlled. Smooth. Locked.

ELEVATE YOUR PRACTICE WITH COOL SCIENCE.

Clinicians wanted change and helped us design SurgiSLUSH™. Teams embrace this system because its advantages are useful and elevate their practice in important ways.

Does your slush product AUTOMATICALLY ...

- Make smooth slush every time because...science?
- Make & Maintain slush on its own, freeing your staff to get things done?
- Lock-in & Confirm sterility for every liter used?
- Auto-start & produce fresh, smooth slush as you drive to work?
- Enable high-volume output to supply multiple procedures?

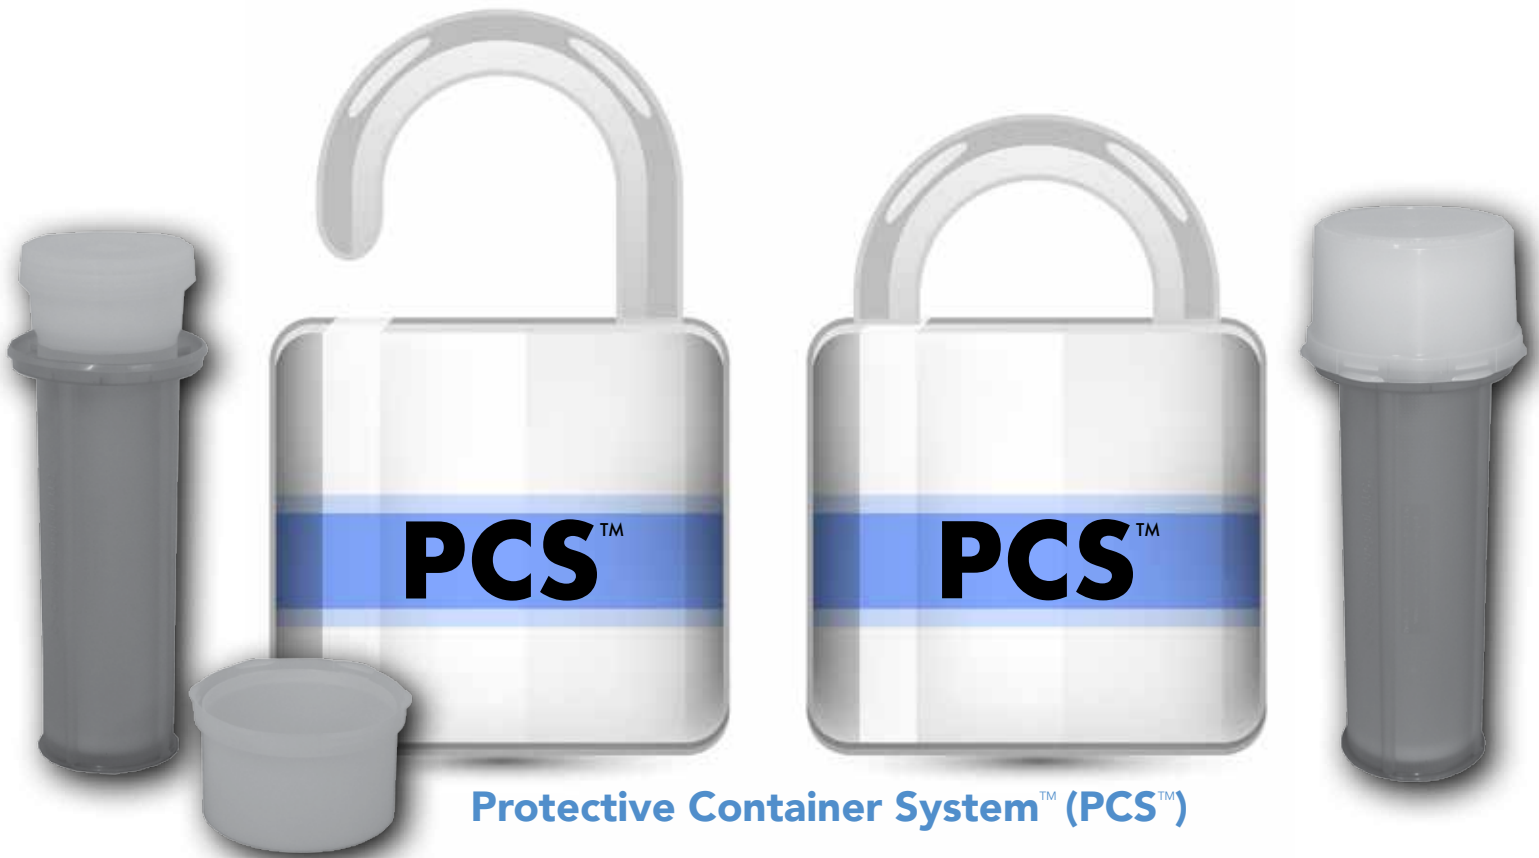

SurgiSLUSH™ does this & more. Our users add unmatched efficiencies, automate best-practice sterile security and gain advantages for staff, surgeons & patients. While your team gets things done, SurgiSLUSH™ makes & maintains always-smooth slush in protected, hydrophobic containers. No fussing with slush during complex cases. More focus. More space. More efficient. Advance with SurgiSLUSH™ automatically.

Additional benefits:

- Far Lower Spend: Slush equipment costs – big advantage for capital budgets.
- Clean: No prolonged slush exposure to the ambient environment; No air-exchanging machines inside your sterile field.
- Quiet: Reusable containers make no noise. No noisy breaking up clumpy slush. No sterile-field attention & maintenance needed. More focus for priorities.
- Reduce Waste: Locked, protected containers are usable for 24 hours and re-slushed easily in minutes. Reduce cost & waste (and save sterile fluid) using one liter at a time.
- Scalable: Add cost-effective containers to increase slush supply - not costly machines.
