CLINICAL REVIEWS & COMMENTS:

"The SurgiSLUSH™ machine has created a great consistent slush that our surgeons love. It's easy to use and the maintenance mode helps our team prepare earlier in the day for cases."
Recovery Specialist, OPO

"Nice job on the design. You guys are amazing." Transplant Nurse Manager - Academic Medical Center

"Our experience has been very favorable." CMO, OPO Executive VP, Leading Transplant Surgeon

"We have one...a fantastic device." OPO CEO

"I love it." Recovery Manager - OPO

"The slush was perfect!!!! ..." BSN RN CNOR Unit Based Educator CVOR

"This is the best slush I've ever used." Chair, Dept of Cardiothoracic Surgery, Academic Medical Center

"Should slush in a sterile self-contained package be standard of care? I believe it should. Great patient-safety centered innovation!" Medical Director and Practicing Urologist

"After 30 years somebody finally figured out surgical slush." Cardiac Surgeon, Regional Medical Center

Elevate Quality - Slash Costs

YOU CONTROL SUPPLY - SMOOTH SLUSH IS AUTOMATIC

SurgiSLUSH™ freezers automatically produce & maintain smooth slush in sealed, protected containers. Gain a quiet, professional process without the noise & disturbance of smashing bricks. Automate slush quality and control supply. Erase broken, wasted bricks and significantly reduce cost. Innovative containers confirm sterile barrier integrity for every liter used and deliver always-smooth slush. Let automation elevate your slush practice.

FAR LOWER SLUSH SPEND - Cost-effective, far lower annual spend. Our OPO customers are saving hundreds of thousands of dollars per year compared to what they were spending on saline bags.

DRAMATICALLY IMPROVE SLUSH QUALITY - Reusable, hydrophobic containers use applied materials science to dependably produce smooth slush.

CONFIRM STERILE-BARRIER INTEGRITY FOR EVERY LITER

Tamper-evident, hard-shell container system seals and confirms sterile barrier integrity before every use.

REDUCE WASTE - Eliminate broken, wasted bricks. No plastic shards. Always smooth and sterile.

CONTROL SUPPLY - Produce your own slush according to your needs. Eliminate back-orders & price increases.

EFFICIENT - Closed containers & freezers make slush fast. Pre-load containers. Delay-Start automatically produces fresh, ready-to-use slush when needed.

QUIET PROCESS - SurgiSLUSH™ containers make NO noise. Nice.

Closed System. Automatic Advantages.

SurgiSLUSH™ Uses Clinician-Guided, Patient-Focused Design

A closed system automatically makes, maintains and protects customized slush outside of the sterile field. It significantly reduces exposure times to airborne contaminants, protecting slush until use. And SurgiSLUSH™ users easily confirm sterile barrier integrity before every use with a tamper-evident container system that meets today's higher standards. Simply put, SurgiSLUSH™ advances your slush practice. Automatically.

Automate customized slush, simplify your sterile field ... and get your surgeons smiling. Modern slush is auto-maintained with customized consistency. It facilitates sterile field focus and allows staff to work on priorities. No more fussing with slush during complex cases. Add some efficiency, open up sterile space and eliminate a cord across the floor.

Supply more slush with less equipment. Just slush, store and make more.

With sealed, 24-hour containers, our users can auto-produce slush any time they choose for max efficiency. You get more, automatically, using modern slush.

Superior Sterile Security. One-Touch Simplicity. Greater Supply.
