CLINICAL REVIEWS & COMMENTS:

"The SurgiSLUSH™ freezer is a major improvement over our old system! This system can provide slush for multiple rooms. The OR environment is much quieter, and less crowded. We make the slush in the morning before our cases start so they are ready for the day and the quality of the slush is far superior over the other technology. With this system, our surgeons have smoother, high quality slush to work with and our nurses don't have to attend to making sure the slush is maintained ..." Clinical Coordinator | CVOR

"My team and our surgeons ... big supporters of SurgiSLUSH™!" Director | Surgical Services

"The chopping / pounding / mixing and timing issues of producing "acceptable sterile slush" comprise some of the more crude things going on in an OR today. It's the 21st century ... there is a better way. THIS!" CVOR Clinical Consultant

"Should slush in a sterile self-contained package be standard of care? I believe it should. Great patient-safety centered innovation!" Medical Director | Practicing Urologist

"Those impervious drapes get holes in them – can't tell you how many times I have had to tell a family about a potential exposure This is why I want a better system ... where sterility is never a concern." Chief, Cardiothoracic Surgery | VA Medical Center

"The slush was perfect!!!! (AND THE ROOM WAS SO QUIET)" BSN RN CNOR | Educator | CVOR

"This is the best slush I've ever used." Chair | Dept of Cardiothoracic Surgery | Academic Medical Center

Closed Slush System Benefits

Slush-using clinicians overwhelmingly requested clinical and economic improvements. We listened. Teams embrace SurgiSLUSH™ because it automatically ensures patient safety, improves efficiency, increases utility and delivers significant savings.

Superior Sterile Security: Finally. Slush you can Trust.

- Closed freezers/tamper-evident containers protect slush until use.
- Intact container seals confirm sterile barrier integrity BEFORE every use.
- No more hours-long open-basin exposures before use.
- No more guarding exposed, unprotected slush during schedule delays.

One-Touch Efficiency: Ready & waiting. Secure, custom slush.

- Patented technology makes, maintains & protects customized slush.
- Equalizes slush-making skills. Lowers stress. Surgeons smile.
- Erases distracting intraoperative slush labor and noise.
- Delay-Start function makes slush on your schedule.
- No case disruptions from sterile barrier issues.
- Removes a trip hazard by erasing a cord from sterile space.
- Increases sterile space with no draped machines.

Greater Supply. Higher Output. Multi-Case Usability.

- Superior economics. Less equipment supplies more cases.
- Superior output. Slush. Store. One touch makes more.
- Portable. Premium coolers supply multiple cases.
- Extended usability. Sealed slush is usable for 24 hours.
- Greener tech. Reusable containers cut material waste.
- Consolidates purchasing. Portable slush supplies all uses.
- Saves sterile fluid using one liter at a time.

Closed System. Automatic Advantages.

SurgiSLUSH™ Uses Clinician-Guided, Patient-Focused Design

A closed system automatically makes, maintains and protects customized slush outside of the sterile field. It significantly reduces open, ambient exposure to airborne contaminants by protecting slush until use. And SurgiSLUSH™ users easily confirm sterile barrier integrity before every use with a sealed, tamper-evident container system. Simply put, SurgiSLUSH™ automates superior sterile security to meet today's higher infection prevention standards.

Simplify your sterile field with ready-to-use, customized slush ... and get your surgeons smiling. Modern, protected slush is produced with one touch and auto-maintains customized consistency. It erases sterile field slush labor to allow more focus on priorities. Automate expert-level slush. Gain efficiency during cases. Open up sterile space. And eliminate a cord across the floor.

Supply more slush with less equipment. Just slush, store and make more. Tamper-evident, 24-hour containers extend usability and deliver multi-case supply. We provide premium coolers to transfer sealed, customized slush to procedure rooms during setup. Choose to get more with 21st century slush.

Superior Sterile Security. One-Touch Efficiency. Greater Supply.
