CLINICAL REVIEWS & COMMENTS:

“The SurgiSLUSH™ freezer is a major improvement over our old system! This system can provide slush for multiple rooms. The OR environment is much quieter, and less crowded. We make the slush in the morning before our cases start so they are ready for the day and the quality of the slush is far superior over the other technology. With this system, our surgeons have smoother, high quality slush to work with and our nurses don’t have to attend to making sure the slush is maintained ...” Clinical Coordinator | CVOR

“My team and our surgeons ... big supporters of SurgiSLUSH™!” Director | Surgical Services

“The chopping / pounding / mixing and timing issues of producing “acceptable sterile slush” comprise some of the more crude things going on in an OR today. It’s the 21st century ... there is a better way. THIS!” CVOR Clinical Consultant

“Should slush in a sterile self-contained package be standard of care? I believe it should. Great patient-safety centered innovation!” Medical Director | Practicing Urologist

“Those impervious drapes get holes in them – can’t tell you how many times I have had to tell a family about a potential exposure This is why I want a better system ... where sterility is never a concern.” Chief, Cardiothoracic Surgery | VA Medical Center

“The slush was perfect!!!! (AND THE ROOM WAS SO QUIET)” BSN RN CNOR | Educator | CVOR

“This is the best slush I’ve ever used.” Chair | Dept of Cardiothoracic Surgery | Academic Medical Center

Sealed. Auto-Expert. Smarter. Simpler. Slush.

Superior Sterile Security | Sealed Protection

- Closed freezers and sealed containers lock out contaminants.
- Intact container seals confirm sterile barrier integrity before every use.
- Adds hours of protection compared to open-air slush units.
- Erases difficult-to-detect slush drape failures.
- No need to guard exposed sterile slush during schedule delays.

One-Touch Workflow | Automated Expertise

- Patented system makes, maintains & protects expert slush until use.
- Equalizes slush-making skills. Erases variability. Lowers stress.
- Deletes intraoperative surgical slush labor. Less distraction.
- Set & forget function makes fresh sterile slush on your schedule.
- Removes a machine cord and frees up sterile space.

Multi-Case Supply | Less Equipment. More Value.

- Portable containers enable multi-room supply.
- Superior economics. Less equipment supplies more cases.
- Superior supply. Stockpile slush for high-volume or emergent use.
- Extends usability. Sealed sterile slush is usable for 24 hours.
- Eco-friendly. Reusable dispensers cut significant material waste.
- Consolidates purchasing. Portable surgical slush supplies all uses.
- Cuts sterile saline waste by supplying single-liter increments.

Streamlined. Sealed. Always Expert.

SurgiSLUSH™ Overwhelmingly Preferred by Evaluating Teams

Smarter, simpler slush is IN. Eighteen (18) consecutive evaluating teams just switched to SurgiSLUSH™. Informed, savvy slush users recognize clear clinical & economic advantages.

Streamlined Workflow:

SurgiSLUSH™ automates pre-made, always-expert, ready-to-use slush. Users delete distracting slush tending during complex cases. And erase variable quality. No machine turnover required. Teams highly prefer no-fuss slush.

Sealed Sterile Security:

SurgiSLUSH™ users lock out airborne contaminants with closed freezers and sealed containers. A closed system adds hours of protection in contrast to open-air slush units. And tamper-evident ChillVault™ containers enable visual confirmation of seal integrity before every use. Knowing sterile barrier integrity BEFORE use is optimal.

Multi-Case Supply:

Closed System SurgiSLUSH™ reduces per-room equipment costs by 25% to 50%. Our users supply more slush with less equipment, less labor and less waste. Today's teams get far more value from smarter, simpler slush.

96% Support for Closed System Slush after Clinical Evaluation.

Slush users want updated sterile slush.
